PROFESSIONAL SUMMARY

Experienced Front-End Developer with over 2 years of hands-on expertise in crafting dynamic and visually appealing user interfaces. Proficient in React.js, JavaScript, and Redux Toolkit, I excel in API integration, feature implementation, and bug resolution. My passion for clean code, creative problem-solving, and collaborative teamwork drives me to deliver exceptional user experiences.

TECHNICAL SKILLS

Languages: JavaScript.

Technologies/Frameworks: ReactJs, HTML5, CSS3, Tailwind CSS, React-Router, Redux-Toolkit.

Developer Tools: VS Code, Git.

Soft Skills: Teamwork and Collaboration, Problem Solving, Communication Skills, Continuous Learning.

EXPERIENCE

Front-end Developer at Infosys | [Reactjs](#), [JavaScript](#), [Redux-Toolkit](#) **January 2022 - Present**

- Developed responsive and user-friendly web applications using React.js, Redux Toolkit and React routing ensuring seamless and efficient user experiences.
- Implemented and maintained various API integrations to enhance functionality and data retrieval, ensuring seamless communication between front-end and back-end systems.
- Implemented efficient state management with Redux to streamline data flow and enhance application performance.
- Optimized application performance through front-end optimizations, including debouncing, reusable components, lazy loading, code splitting
- Integrated Tailwind CSS to expedite styling processes and maintain a consistent design system across the applications.
- Collaborated with cross-functional teams to gather requirements and translate design mockups into interactive and functional components.

PROJECTS

NetflixGPT 🔗 | [React](#), [React-router](#), [Redux-toolkit](#), [Firebase](#), [Tailwind CSS](#)

- Implemented Firebase for a secure and seamless user authentication experience.
- Dynamically fetched movie details from the TMDB APIs fused with GPT technology for tailored movie suggestions using OpenAI's recommendation.
- Managed app states effortlessly with Redux, ensuring a smooth and organized user experience with styling of Tailwind CSS also employed custom hooks, lazy loading for less loading time.

Youtube Clone 🔗 | [React](#), [React-router](#), [Redux-toolkit](#), [Tailwind CSS](#)

- Dynamically fetched videos from Youtube Live API, styled by Tailwind CSS.
- Module Consists of 4-5 different types of users with different functionalities.
- Implemented debouncing for dynamic search and optimized it by storing result in cache using Redux toolkit.
- Implemented live chat feature using API Polling.

Viraj's Portfolio 🔗 | [React](#), [React-router](#), [Redux-toolkit](#), [Tailwind CSS](#)

- Contains my Interactive academic introduction, showcasing of my personal projects with live demo and Github link for source code.

EDUCATION

VPKBIET, Baramati

B.E. - Mechanical Engineering - CGPA - 8.64

2016-2020

Baramati, Maharashtra
